Raney Ranch Retrievers is a premier Labrador Retriever training and breeding facility and is owned and operated by Steve & Carrie Raney. We train six days a week and put together mock Hunt Test weekly. Raney Ranch is located in the mountains on 90 acres in the beautiful back country of San Diego County over looking Lake Henshaw with a view of Palomar Mountain.

We have worked hard in establishing a facility for training Retrievers. Our training grounds and ponds provide us the ability to train your Retriever at any level, rather it be Conditioning, Obedience, Started Gun Dog, Finished Gun Dog and all levels of Hunt Test. We are also dedicated to breeding high quality Labrador Retrievers to train to compete in Hunt Test and Field Trials and to be the best that they can be. We breed puppies that are good looking, willing to work, intelligent and to be the best companion and hunting partner a hunter can have. We also provide stud services with our accomplished titled dogs. In addition to our private 90 acre ranch we have access to land on Palomar Mountain, Mesa Grande, Lake Henshaw to train and compete and to keep the trained dog in shape for what they like to do the most. HUNT!

Training Grounds

Programs

All fees include feeding, boarding, birds and training. There are no hidden training costs. All dogs must have the bordetella vaccination and immunizations must be up to date for the safety and health of each dog. It is recommended that all dogs be current on monthly heartworm and flea and tick preventative medication as we are located in a rural wooded area. Dogs not on heartworm preventative need to be tested for heartworm by a veterinarian before they start their training. Heartguard and Frontline can be provided each month at the owner's expense.

Boarding with Exercise

Dogs are aired and exercised three times a day approximately 20-30 minutes with an opportunity to retrieve and swim.

Boarding with Conditioning

Dogs are retrieving bumpers and/or birds twice a day on land and/or water using whistles and launchers. This program is great for a trained hunting dog getting ready for the hunting season or a hunt test or field trial dog getting ready for a hunt test or a field trial.

Obedience Training (On Lead)

The dogs stay at our kennel during their training and housed in individual runs. This includes a session at the end of the training with you and the trainers, as well as any follow up sessions you may need:

Obedience Training (OFF Lead)

The dogs stay at our kennel during their training and the owners are invited to schedule sessions with the trainers, as well as any follow up session you may need:

*Dog must have completed the 4 week On Lead Obedience Training

Puppy Head Start

This is for pups 18 weeks to six months old. Introduction to water, birds and basic obedience commands. Our goal is to make each puppy as "birdy" as possible and to love the retrieving game. It is an introduction to the skills needed for more advance Gun Dog training.

Basic Gun Dog Training

(4 to 6 months) Introduction to basic training is for dogs at least 6 months old. Obedience is the foundation of all retriever training. Obedience includes sit (stay), here and heel. At this time we condition the dog to the collar, teach to stop on a whistle, force fetch, stick fetch, single retrieves and steady. We begin to teach the dog double retrieves and to quarter the field.

Advanced Gun Dog Training

(4 to 6 months) At this time we teach hand signals by teaching force to pile, stick to pile, T, double T and swim by. We then teach pattern blinds, blind drills, diversions with pattern blinds, cold blinds, water blinds, multiple blinds and lots of singles off multiple guns.

Hunt Test Program

(4 to 12 months) This program includes perfected handling, literal casting, casting mechanics, carry a straight line, land and water triples, how to fight the factors and meeting the needs of each individual dog to compete in AKC Senior and Master Hunt Test.

Transition Program

Transition from the yard to the field. Pattern blinds, blind drills, diversions with pattern blinds, cold blinds, water blinds, multiple blinds, and lots of singles off multiple guns.

Day Training

By appointment only. This is for the owner and his dog to come and train with us or on the grounds. We are far from the nearest store so don't forget to pack drinks, water and a lunch! This is great time for questions about training or handling your dog. (Call on prices for birds if you want to use live flyers for your dog).

Facilities

Filming "Randy Jone's Strike Zone" for the Outdoor Channel on Raney Ranch
